

# Formal contract for photovoltaic panels installed on roof

What is a solar photovoltaic (PV) installation?

A solar photovoltaic (PV) installation comes with a proposal and a contract, so if you're thinking about going solar, it's important to understand what you'll be signing.

What should a solar panel contract include?

Your solar panels' contract should estimate how much energy will be produced and what savings the client can expect. This section of the agreement should clearly outline how the system's performance will be monitored and what guarantees are given. Solar power has many benefits for businesses and commercial properties, such as

What is a solar power contract?

A solar contract is a signed agreement between a person and a solar power installation company that clearly outlines every part of the solar panel installation process, including the steps before, during, and after the actual installation, and who is responsible for each.

What should a solar installation contract include?

Your solar installation contract should include crucial details about what happens and who is responsible for each, such as: Before your solar panel installation company can begin work on your roof, they have to get construction and/or electrical work permits from the city or county where you live.

Can a roof support solar panels?

Make sure your roof can support solar panels. A solar installer, roofing expert, or structural engineer can help you determine your roof's solar suitability.

What are the different types of solar panel agreements & proposals?

There are different types of solar panel agreements and proposals available. The one you use will depend on a few different factors. These factors include whether you lease or buy solar panels and whether the contract is for a home, business, or even a large development. A power purchase agreement or PPA is similar to a solar lease agreement.
