Are CZTS silicon-based photovoltaic layers suitable for solar cells?

An emerging material for use in photovoltaic solar cells, CZTS silicon-based photovoltaic layers offer the advantages of abundance, non-toxicity, and a direct bandgap, making them an attractive candidate for solar cell applications.

What is a photovoltaic solar cell?

In 1893 the photovoltaic effect was reported leading to actual photovoltaic solar cells (PVScs) that can produce electricity from solar radiation taking into consideration the Shockly-Queisser efficiency limitations.

How a photovoltaic solar cell can be fabricated?

Schematic diagram of a photovoltaic (PV) solar cell and the futuristic next-generation model PV solar cells can be fabricated by using various semiconducting materials, in which cell parameters play a crucial role in the photovoltaic solar cell's performance.

Are thin-film PV solar cells a good choice?

The thin-film PV solar cell technologies are attractive due to the low cost of fabrication. However, this is ousted by their low levels of efficiency. Compared to the first generation, the second-generation PV solar cells are less mature and have a small market share.

Can artificial neural network be used in PV solar cells?

Artificial neural network considered in the proposed application The first-generation (c-silicon-based) PV solar cells dominate the PV solar cells industry due to their low production cost and the best commercially available efficiency.

What is a solar power system (PW)?

Solar power systems (PW) comprises solar panel, inverter and supercapacitor. The solar panel can absorb photons and use the PV mechanism to transform photon energy into electricity. Notable, however, solar panels and their efficiencies are affected by factors such as temperature, irradiance level, panel orientation and cell type.

A multi-junction solar cell is an advanced photovoltaic device incorporating multiple semiconductor layers with varying band gaps. Unlike traditional single-junction cells, which use a single semiconductor material, ...
