

Why is France promoting solar energy in the European Union?

France is among the most vocal of European Union nations about the need to better defend the bloc's economic interests. The French government will amend regulations and provide subsidies to support the installation of domestically-made solar panels, key for its energy transition, to reduce the dominance of Chinese equipment manufacturers.

How much will France invest in a solar farm?

As France aims to double the pace of annual solar farm installations to 6 gigawatts, the government will support two panel-production plants led by French startups Carbon SAS and HoloSolis SAS, which will represent a combined EUR2.2 billion (\$2.4 billion) of investment, Le Maire said.

What are France's energy goals?

France aims to boost the share of renewable energy to at least 33% of total energy consumption and 40% of electricity production by 2030 and these targets are set out by law. The government set out specific near-term targets under the 10-year energy investment plans (programmation pluriannuelle de l'énergie or PPE) enacted in 2020.

What are the targets for renewable electricity generation in France?

The following targets were set for the development of renewable electricity generation: In 2021, solar electricity accounted for 3% of France's electricity production. At the end of March 2022, the total installed capacity was 14.6 GW.

How much solar power does France have in 2023?

France had roughly 24.5 GW of grid-connected solar PV capacity by the end of 2023, the IEA PVPS said. Its full report can be read [here](#). [Understanding PV module supply to the European market in 2025.](#)

Does France use geothermal energy?

Geothermal energy is a minor source of electricity generation in France, representing only 0.1% of renewable electricity production and 2.3% of renewable energies for thermal use in 2020. France essentially uses low and medium power geothermal energy for heating networks.

Solar choice provides a comprehensive resource on PV solar and a platform from which to compare products and solutions. After deciding on the merits of solar PV I tried getting an independent quote from 1) a cold phone call marketer and 2) a door knock marketer. In both cases the information can best be described as flimflam and the quotes ...
