

What is HDF energy doing in French Guiana?

French hydrogen firm HDF Energy has started construction on a multi-MW production site in French Guiana that also will offer 128 MWh in green H₂ storage. The CEOG Renewable Power Plant will feature electrolyzers from McPhy, while HDF will install the hydrogen fuel cells.

Is a solar park in French Guiana ready for green hydrogen production?

French hydrogen technologies developer HDF Energy (EPA: HDF), investment fund Meridiam and petroleum operator SARA have launched construction of a solar park with batteries and 16 MW of electrolyzers for green hydrogen production in French Guiana.

What is French Guiana ceog?

The \$200 million French Guiana CEOG will combine a solar park, long-term hydrogen and short-term battery storage. HDF started the project with financial support from a 25-year power purchase agreement with French utility EDF. HDF's equity partners include the infrastructure investment fund Meridiam and petroleum company SARA.

How does ceog fit with French Guiana's energy strategy?

The population of French Guiana is very quickly increasing. Guiana has to face a considerable energy deficit, especially in the west where the demographic growth is booming. By providing several MW of reliable and clean energy, CEOG fits with French Guiana's energy strategy.

What is HDF Energy's \$200 million Centrale Electrique de l'Ouest Guyanais?

HDF Energy's \$200 million Centrale Electrique de l'Ouest Guyanais (CEOG) project is based on its proprietary power-to-power Renewable power plant. The plant will comprise a solar PV park, a 16-MW electrolysis platform, a long-term hydrogen storage unit, two 1.5-MW fuel cell systems, as well as a short-term lithium-ion battery storage unit.
