The configurability and endless practical use cases of lithium-ion batteries make them highly popular in many industries. Thanks to their high efficiency, impressive power to weight ratio and low self-discharge, it's expected that the demand for lithium-ion batteries will increase by 7X globally between 2022 and 2030.. These batteries have become so ubiquitous that many ...

However, extremely cold temperatures (below 0°C) can also compromise the battery's components, so avoiding such conditions is equally important. To keep your people and your premises safe, it's important to make a strategic investment in specialised storage solutions as well as responsible disposal solutions.

At the time of its inauguration in late December 2017 it was claimed as the largest lithium-ion BESS project in the world by technology provider AES. Mandatory evacuation orders were issued by local authorities in Escondido, California, after a fire broke out at a battery energy storage system (BESS) facility.
