

# French Polynesia uk power battery

Where is France's largest battery energy storage system located?

reported a while back on the completion of an expansion at continental France's largest battery energy storage system (BESS) project. BESS capacity at the TotalEnergies refinery site in Dunkirk, northern France, is now 61MW/61MWh over two phases, with the most recent 36MW/36MWh addition completed shortly before the end of 2021

Is totalenergies the biggest battery storage project in France?

The energy major has 103MW of capacity market contracted energy storage online or coming online in France. Interestingly however, despite presiding over the single biggest project in the country, TotalEnergies sits second in Clean Horizon's chart of France's most prolific (publicly announced) battery storage project owners and developers.

Did SSE battery energy storage systems keep the lights on in the UK?

Following a major interconnector trip, BESS kept the lights on in the UK. Image: SSE Battery energy storage systems (BESS) from several different firms have been proving their value as they supported Britain through recent interconnector failures.

Is France a good place to invest in battery storage assets?

This is all the more encouraging because unlike the UK, there are only two revenue streams available for battery storage assets in France today. The other is frequency control reserve (FCR), aka primary control reserve (PCR), what could be seen as the first rung of the ancillary services ladder.

Where are UK power reserve batteries stored?

Located in Asfordby in Leicestershire, and Ellesmere Port and Runcorn in Cheshire, the three battery storage sites recently came online following licensing approval and successful testing. UK Power Reserve is part of the Sembcorp group.

The market for battery energy storage is estimated to grow to \$10.84bn in 2026. The fall in battery technology prices and the increasing need for grid stability are just two reasons GlobalData have predicted for this growth, with the integration of renewable power holding significant sway over the power market.
