

How much electricity does French Polynesia use?

Hydroelectricity accounts for 23% of the electricity mix in French Polynesia. It is the first renewable energy source in French Polynesia with an installed capacity of 49.3 MW. Solar water heaters produce hot water using solar energy. In 2019, the electricity consumption saved is approximately 22 GWh, i.e. 3% of electricity consumption.

Does French Polynesia rely on hydrocarbons?

French Polynesia, like most island territories, is highly dependent on hydrocarbon imports. In 2019, 93.8% of energy consumed in the archipelagos came from imports of various petroleum-based fuels. The renewable energy penetration rate in power generation stood at 28.78% in 2019. This figure has remained stable over the last five years.

What is French Polynesia's energy transition plan?

French Polynesia's energy transition plan has three main objectives: Change the energy model, by gradually replacing the use of fossil fuels with renewable energies in all activities

What is PEC in French Polynesia?

In French Polynesia, mainly crude oil and its derivatives, hydraulic power and solar radiation PEC is expressed in tonnes of oil equivalent (toe), unit that allows the different energies to be compared in relation to their intrinsic characteristics. litres of hydrocarbons were imported in 2019 in French Polynesia. is the dependency rate.

As of 2022, the electricity consumption in French Polynesia predominantly relies on fossil fuels, accounting for over two-thirds or approximately 67% of the total electricity generation. The remaining portion, nearly a third, comes from low-carbon or clean sources. Specifically, around 26% of the electricity is generated from hydropower, while about 7% comes from solar energy.

Naturism In French Polynesia. I am contemplating a side trip to F.P. on the way to Australia and NZ. I want to know if naturism (nudism) is as acceptable on the beaches of French Polynesia as it is in mainland France. Some have said the Tahitians enjoy topless tanning as much as the Europeans, but prefer total nudity to be kept on offshore ...

SMA Solar Technology AG and its subsidiary SMA Sunbelt Energy GmbH have installed French Polynesia's first integrated PV-plus-storage project. The project features an output of more than 1MW on the island of Tetiaroa, with 60% of the island's electricity demand covered following the completion of the installation. In addition, up to ...
