The New Zealand energy transition is gathering pace, with the Government recently committing to its Emissions Reduction Plan and a range of support to accelerate the transition to renewables. Energy companies are also more actively pursuing sustainability strategies and investments to support decarbonisation and the transformation of the energy system.

The New Zealand Energy Strategy, and the New Zealand Energy Efficiency and Conservation Strategy in particular, will also help us to become more energy efficient in our homes, working places and in transport. Improving the way we use energy makes good sense in terms of improved comfort, lower costs and reduced greenhouse gas emissions.
