

GCL Energy's energy storage system goes into operation

How many kilowatt-hours can a GCL energy system power?

During its lifetime, the system can push a cumulative 28.8 million kilowatt-hours into the power grid, easing the strain on the power network during the summer peak. GCL Intelligent Energy is a subsidiary of Golden Concord Holdings Ltd. and is mostly engaged in energy-saving lighting, central air conditioning and distributed energy projects.

What's happening at GCL in Shanghai?

A view of the booth of GCL during an expo in Shanghai. [Photo provided to China Daily] Full-scale construction has begun on East China's largest pumped storage power station, with power generation scheduled to start before 2030, said its operator GCL Energy Technology Co Ltd.

How much does GCL energy technology invest in Zhejiang?

The project in Zhejiang province entails a total investment of about 12.5 billion yuan (\$1.76 billion), and is the largest clean energy project invested by GCL Energy Technology.

How many charge cycles can a GCL Solar System run?

It has an installed capacity of 10 megawatt-hours and can run 3,600 charge cycles. The system features a high charge and discharge rate, fast response and a long cycle life, the Securities Times reported on Sept. 11, citing Fei Zhi, president of GCL Intelligent Energy.

What is China's largest commercial lithium-ion energy storage project?

(Yicai Global) Sept. 11 -- The distributed energy storage demonstration built by GCL Intelligent Energy Co. [HKG:0451] and Jiangsu Zhongtian Technology Co. [SHA:600522], China's largest commercial lithium-ion energy storage project, is officially in operation.

Who is GCL Intelligent Energy & Zhongtian technology?

GCL Intelligent Energy is a subsidiary of Golden Concord Holdings Ltd. and is mostly engaged in energy-saving lighting, central air conditioning and distributed energy projects. Zhongtian Technology is mainly involved in optical fiber and power transmission.

GCL System Integration Technology strives to be the world's leading integrator of comprehensive energy systems. ... Energy Storage. Residential; C&I; Utility; Inverter; Learn More. Solution. Provide Quality ...

The largest pumped storage power station in terms of capacity in East China has entered the full-scale construction phase and is scheduled to begin generating power before 2030, said its operator, GCL Energy ...
