

What does Gabon Power Company do?

Gabon Power Company develops and co-finances projects to provide cost-effective and sustainable energy that supports Gabon's economic activity. Our projects aim to accelerate the growth of the economy for the benefit of the population and future generations.

What is the main energy source in Gabon?

It also ranks as the 3rd largest oil producer in sub-Saharan Africa; following Nigeria & Angola. The country's two main energy sources are fossil-fuels and hydropower. 51.7% of Gabon's total produced electricity in 2015 were generated from hydro, and 48.2% were from fossil fuels.

What type of electricity does Gabon use?

Renewable electricity here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal power. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Gabon: How much of the country's electricity comes from nuclear power?

How much energy does Gabon use?

Table: Gabon's Final Consumption of Different Energy Sources 2000-2018 During the year 2016, Gabon's imported electricity's capacity was about 344 million kWh, with no export capacity at all, while the country's exported crude oil in the year 2017 was approximately 214,200 barrels/day.

Is biomass a source of electricity in Gabon?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Gabon: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

Who controls the oil industry in Gabon?

The government of Gabon controls all petroleum and mineral rights within the state. In 2011 a presidential decree created the Gabon Oil Company (GOC). This new entity works in partnership with international companies operating in Gabon and operates two fields: Obangue and Remboue.
