

Galvanized pipe to make solar panel bracket

What are solar panel mounting brackets made of?

With their help, our mounting brackets are now made of premium material: aircraft-grade, anodized aluminum that's non-corrosive, durable, and lasts for several decades. As we mentioned, the Philippines is damaged by typhoons every year. Our solar panel mounting brackets have been tried and tested by the powerful typhoons that hit them.

How to install a solar panel bracket?

To install a solar panel bracket, apply adhesive to the upper side of the bracket (this is where the solar panel will be positioned). Position and press firmly the side bracket along the side of the solar panel and repeat this process with the other side bracket. Allow the adhesive to dry as per the product specifications.

How do I mount solar on a metal roof?

There are many options when mounting solar on a metal roof, the details of which can impact installation costs and lifetime performance. Metal rooftop mounting consists of two basic parts: the roof mounting hardware and the actual solar panel attachment interface.
