How do I determine the size of a generator?

To determine the size of the generator you need, envision what appliances you need during a power outage and use Generac's sizing calculator or schedule an in-home assessment. Generac offers a range of products, from essential circuit coverage to whole-house coverage with load-shedding options.

What is a generator sizing calculator?

Please Note: This online calculating tool requires javascript to be turned on in your browser. The purpose of the generator sizing calculator is to determine the estimated size of the generator which is based upon the electrical equipment that will be used while on power that is supplied by the generator.

How do you calculate watts on a generator?

As described above, Watts may be calculated by multiplying Volts times Amps. This Generator Sizing Calculator is divided into five sections which are Pre-Loaded with electrical information that reflects most of the electrical device options for the home which may be essential to operate while on generator power.

How do you calculate generator capacity?

Add together each item's running watts. Then, to roughly account for starting wattage, add the single-highest starting watts figure to the total. Multiply that figure by at least 1.25. The resulting number is the minimum generator capacity you should consider.

How do I choose the right size generator?

Selecting the right size generator is important. Choose too small of a generator, and you won't be able to power all your home's circuits resulting in power failure. Choose too large of a generator, and it'll be inefficient and not cost-effective, consuming more natural gas or propane than necessary during a power outage.

Can Generac size a generator?

Note: Generac customer support cannot size generators because we are not physically onsite to inspect the application, calculate load size, and are not familiar with your local applicable codes. Similarly, we cannot size wiring because we are not on-site to inspect the application, nor are we familiar with any applicable local codes.
