

# Gibraltar soleil power

Why does Gibraltar need a new power plant?

This secures Gibraltar's energy supply economically, environmentally and sustainably. The associated closure of the three old plants represents the largest measure taken to improve air quality and reduce greenhouse gas emissions. The new power plant consists of six engines; 3 of which run on natural gas and 3 of which are dual fuel.

Why does Gibraltar have a power station?

Through a remarkable feat of engineering, the power station on the North Mole in Gibraltar Harbor allows the quasi-island to continue its proud history of independence and self-sufficiency, regardless of what international politics hold in store.

Where is Gibraltar's new power station located?

The location of the new power station is on the North Mole in Gibraltar Harbor, an advanced arrangement of a gas-fired power station with an LNG hub which will serve as the basis of the island's future power supply.

How many solar panels are installed in Gibraltar?

As part of the works performed, Eco Wave Power integrated eight solar panels, on the surface of its eight floaters, operational in Gibraltar. Each panel has the installed capacity of 330 watts; thus, all eight panels have an installed capacity of 2.640 kw.

Why does Gibraltar need a LNG power system?

The people and businesses of Gibraltar will have better air quality, a quieter environment, and see the rewards of better energy efficiency. Michael Caetano, Chief Operational Officer of the Gibraltar Electricity Authority (GEA) When Gibraltar upgraded its nearly 40-year-old power system, they opted for a unique LNG solution.

How does Gea work on Gibraltar?

With this new power plant, the GEA has nearly 100% automatic operation. Much less operator intervention is required." With only 6.5 square km available on the entirety of the island, space is a precious commodity on Gibraltar.
