With sunshine abundant in Sri Lanka, solar provides one of the biggest rays of hope for this green transition. Through its Nationally Determined Contributions, the Sri Lankan government has pledged that 70% of its energy will come from renewable sources by 2030. The country already has a well-established solar sector.

Figure 4 Sri Lanka's power demand peaks between 1800 and 2000 hours Figure 5 9The domestic segment accounts for the majority of Sri Lanka's electricity consumers Figure 6 Industrial and commercial consumers drive Sri Lanka's electricity consumption Figure 7 Low shares of large hydro generation adversely impact the CEB's profitability
