

What is kraftblock energy storage?

Kraftblock's high-temperature thermal energy storage system allows you to switch to renewable energy. Kraftblock's innovative technology offers unparalleled large-scale, long-duration energy storage, empowering industries to transition towards sustainable thermal processes.

Is kraftblock a new energy storage startup?

Sulzbach-based Kraftblock, an innovative energy storage startup, successfully secured EUR20 million in a Series B funding round led by Shell Ventures, the venture capital arm of energy giant Shell, along with participation from five other global investors including Finindus and A&G Energy Transition Tech Fund.

What does kraftblock supply?

It supplies hot air, thermal oil, steam or water on any temperature level between 50°C and 1,300°C. Our systems are divided by the source or the use. Discover what fits your business. Industry specific. Energy storage solutions. Learn how you can deploy Kraftblock's Systems.

How long can heat be stored in a kraftblock container?

Heat up to 1,300°C is stored in the Kraftblock container for up to two weeks. The discharged energy is used on any temperature level to generate power, decarbonize heating networks or process heat. Our Systems. One storage - plenty of solutions.

Can you use green heat in a kraftblock container?

Use green heat for steam, air or thermal oil with Kraftblock. The Kraftblock container charges heat and is able to use different energy sources. Heat up to 1,300°C is stored in the Kraftblock container for up to two weeks. The discharged energy is used on any temperature level to generate power, decarbonize heating networks or process heat.

Is kraftblock a good investment for the industrial sector?

While for A&G Energy Transition Tech Fund, the VC arm of Spanish bank A&G, Kraftblock stands as an early investment with significant potential to drive the industrial sector's decarbonization. Kraftblock's storage system boasts high thermal conductivity, facilitating efficient heat transfer.

KRAFTBLOCK is a universal storage system where both heat and electricity can be stored and extracted. Electricity can be converted into heat (PtH) and back from heat to electricity (HtP). Total efficiency is up to 60% (Electricity → Electricity) and 92% (Electricity → Electricity + Heat).

<p>Through its patented and sustainable thermal storage technology, Kraftblock enables the energy transition and decarbonization of processes in the energy and industrial sectors. The ...

Greece kraftblock energy storage

Thermal energy storage. Large-scale, sustainable, and cost-efficient. Kraftblock is a highly efficient heat storage system that can buffer thermal energy at very high temperatures, designed to decarbonize power generation ...

Kraftblock developed a special storage material with high capacity that is able to store even 1,300°C. Furthermore, the team implemented this material into fixed storages (big storage vessels with several 100m³ of storage material for internal heat utilisation) as well as in mobile storages.

Kraftblock is an energy storage device or universal storage. Basically, it is a thermal storage unit, but it can also be used to transfer and temporarily store electricity and ...

Sulzbach-based Kraftblock, an innovative energy storage startup, successfully secured EUR20 million in a Series B funding round led by Shell Ventures, the venture capital arm of energy giant Shell, along with ...

Thermal energy storage solution firms Brenmiller and Kraftblock have agreed to deploy large-scale commercial projects for large European utilities, totalling 2GWh and 150MWh respectively. Brenmiller Energy has ...

Through its patented and sustainable thermal storage technology, Kraftblock enables the energy transition and the decarbonization of processes in the energy sector and any industries from food to chemicals, paper, ceramic and steel.

Sulzbach-based Kraftblock, an innovative energy storage startup, successfully secured EUR20 million in a Series B funding round led by Shell Ventures, the venture capital arm ...

Last week, MGA Thermal said it raised AU\$8.5 million (US\$5.54 million) from assorted VC investors, while Shell is one of the existing backers of the company. Both companies make storage systems based on blocks of ...

Saarbrücken, Germany. 25 September, 2020. Dutch clean energy conglomerate Koolen Industries has invested EUR3 million in Kraftblock, a German firm that uses nanotechnology to develop new ...

Kraftblock's innovative technology offers unparalleled large-scale, long-duration energy storage, empowering industries to transition towards sustainable thermal processes. It supplies hot air, thermal oil, steam or water on any temperature ...
