

Grenada hemera energy manufacture

Where does Grenada get its energy from?

Grenada derives almost all of its energy from imported hydrocarbons. In 2020, non-renewables accounted for roughly 98% of installed capacity and electricity generation, with solar energy making up the difference.

Does Grenada have a wind farm?

Grenada has had success with implementing energy efficiency and renewable energy projects. To date, GRENLEC has assessed five sites on the main island and two on Carriacou for wind farm feasibility. A wind-diesel hybrid has been discussed for Petite Martinique, but its development is on hold.

How much electricity does Grenada use?

In 2020, Grenada produced 223 GWh of electricity, relying mainly on fossil fuels (98.12%), with a small contribution from solar energy (1.88%). In 2018, peak demand was 33.2 MW. In 2016, Grenada consumed 185.1 million kWh of electricity. As of 2018, 95.3% of the population had access to electricity.

Who is responsible for energy projects in Grenada?

The MOID (Ministry of Infrastructure Development, Public Utilities, Energy, Transport, and Implementation) is responsible for energy programs in Grenada. MOID handles the majority of permitting related to energy projects.

Who owns the electricity in Grenada?

Utility investors: 50% with U.S.-based WRB Enterprises; the public holds 25%; and the government, its employees, and the National Insurance Scheme Grenada hold the remaining 25%. Nearly 99% of electricity is sourced from diesel fuel. The utility maintains an installed capacity of 48.6 MW spread across the three islands.

What is the potential of geothermal power in Grenada?

Geothermal studies reveal a potential of approximately 50 MW of baseload power; two 20-MW geothermal projects have similarly stalled in development. Solar photovoltaics (PV) have high potential on Grenada because the country's global horizontal irradiation exceeds 5 kWh/square meters per day.

Find detailed information on Manufacturing companies in Grenada, including financial statements, sales and marketing contacts, top competitors, and firmographic insights. Dun & Bradstreet gathers Manufacturing business information from trusted sources to help you understand company performance, growth potential, and competitive pressures.

The project, called the Grenada Renewable Energy Project, will be located at Maurice Bishop International Airport (MBIA), the main international airport of Grenada. Option 2, the solar-plus-storage project, would
