

The moment was years in the making and represents a pivotal step forward for an ambitious government initiative to energize Haiti's rural communities with 24/7, solar-powered electricity service. It also serves as a powerful illustration of the herculean perseverance of dozens of Haitian civil servants working tirelessly through extremely ...

Haiti needs to build and strengthen its infrastructure in the energy sector across the country. It's a tall order for the Haitian government to fulfill, but the U.S. Trade and Development Agency (USTDA) is lending its support in the form of a grant it has awarded to Haitian social agency, Eneji Pwop S.A. (EP).

Given its lack of electrification and remote areas, Haiti is considered a prime candidate for microgrids. NRECA also is focused on microgrids in areas of Africa where there is no central transmission system. ...

With support from Creating Hope in Conflict, a Humanitarian Grand Challenge, EarthSpark helped SunGate take a critical step towards addressing this challenge by launching South Sudan's first solar microgrid in ...

The SparkMeter microgrid metering system enables utilities to implement pre-payment as well as real-time monitoring and control on microgrids and central grids alike. The low-cost system consists of four hardware components, a cloud-based operator interface, and a mobile money or cash-based pre-payment system. First prepay microgrid in Haiti

The US Trade and Development Agency (USTDA) is promoting a Request for Proposals (RfP) to US companies to design, build and install hybrid solar PV and energy storage microgrid generation systems in Haiti. The RfP is ...
