

Hanwha q cell cyberjaya

Where is Hanwha Q Cells based?

German headquartered Hanwha Q CELLS today announced that it will build a large-scale module factory at its existing site in Cyberjaya, Malaysia. The new facility will include four production lines and automated equipment for the company's high performing solar modules totaling a capacity of 800 megawatt (MW).

When will Hanwha Q Cells start production at Cyberjaya?

The construction of the module production facility at the Cyberjaya site will start in early 2015. Hanwha Q CELLS will start to move in the production equipment in parallel. The new production lines are planned to be ready for a first test production in Q3 2015 and expected to reach full utilization by early 2016.

Is Hanwha Q Cells Malaysia ready to become a global hub?

Seong Joo Ryu, Managing Director of Hanwha Q CELLS Malaysia, added: "Hanwha Q CELLS Malaysia is ready to become the company's main hub for the sustainable mass production of high quality solar cells and modules at competitive costs."

Who owns Q Cells GmbH?

Hanwha Group acquired Germany's Q CELLS GmbH in 2012 along with its solar cell factory located in Cyberjaya near Kuala Lumpur. The factory has since been used by Hanwha Q CELLS as its production center. At the time of the acquisition, the factory was limited to producing 800 MW of solar power cells.

What is Hanwha qcells?

Hanwha Qcells introduces 6-busbar cell layout. Production record for Q.ANTUM solar cells of 5 GW. Hanwha Qcells announces it successfully mass produced 1 billion Q.ANTUM solar cells. Q.ANTUM is Hanwha Qcells' proprietary cell technology and supercharges ordinary crystalline solar cells and modules.

Why is Cyberjaya launching a new module Fab?

"The new module fab in Cyberjaya is the logical next step in carrying forward the company's international setup of R&D and mass production," Kim added.
