What is HanTile solar roof?

Based on Hanergy's MiaSol[®] high efficiency Thin Film cells, the Hantile is the ultimate roof application of thin film. Finally all visible surface of a curved solar roof tile can be efficiently used, making it possible to get maximum yield of a tile roof. Under all circumstances.

What is building integrated PV?

Building Integrated PV can bring you attractive green buildings by integrating solar power solutions in flat and slanted roof-tops, windows, facades, curtain walls and ceilings. Hanergy provides a wide range of more cost-effective and convenient solar power application products with maximum mobility and flexibility for all daily life purposes.

What are integrated PV roofing materials?

Integrated PV roofing materials are proven applications of CIGS modules. Building-integrated photovoltaics (BIPV) and building-applied photovoltaics (BAPV) may be niche applications today, but they are expected to become common-place in a carbon constrained near future.

Producing energy with solar panels is a beautiful thing. Therefore we designed our Solibro thin film solar modules to make them the best looking in the world, instead of just manufacturing them. With high efficiency - one of the most ...

The ultra-efficient, thin, flexible solar panels from Hanergy are possible as a result of gallium arsenide (GaAs), a semiconductor that is moisture and UV radiation resistant. The panels are...
