

Heimdall power Denmark

What is Heimdall power?

Heimdall Power's vision is to optimize power grids globally. Since 2016 our innovative technology has optimized grid utilization with state-of-the-art software and unique hardware technology. We continue to innovate and improve, creating value for customers, shareholders and society. Have any questions? Talk with us directly using LiveChat.

How does Heimdall power use neuron sensors and software?

By collecting and analysing digital data, Heimdall Power's Neuron sensors and software help to increase power line capacity, improve planning of energy flow, make grid operations more cost-effective, reduce downtime and electricity loss, and extend the lifetime of grid infrastructure.

Will Heimdall power digitize the power grid?

Heimdall Power and the Norwegian DSO, Fagne have signed an agreement to digitize the latter's whole regional transmission grid in Haugalandet, Sunnhordland, inner Ryfylke and parts of Hardanger as well as increase the utilization of the power grid in the region.

What is Bayernwerk Netz Heimdall power?

Expanding Collaboration With Bayernwerk Netz Heimdall Power's vision is to optimize power grids globally. Since 2016 our innovative technology has optimized grid utilization with state-of-the-art software and unique hardware technology. We continue to innovate and improve, creating value for customers, shareholders and society.

Will Heimdall power increase the capacity of today's GRiD?

Heimdall Power estimates that its solution can help to increase the capacity of today's grid by 30 per cent. The International Energy Agency (IEA) estimates that USD 7.2 trillion will be invested in transmission and distribution grids during the period 2012-2035. Heimdall Power's target market is all power lines above 7 kV.

What can Heimdall power do for You?

Increased insight from Heimdall Power's solutions gives the grid companies new opportunities to optimize the utilization of the power system's overall resources - the cost savings are significant, security of supply increases and we can more quickly connect new renewable power generation and new green industry to the power grid.

Heimdall Power is a young and ambitious technology company, born in Norway. We're on a special mission to optimize power grids around the globe, and we've got the perfect technologies to do so. Through our world-famous Neurons (dubbed "Magic Balls" by the media), and it's digital sibling, the Virtual Neuron, we are increasing power grid ...

Heimdall power Denmark

Heimdall Power's vision is to optimize power grids globally. Since 2016 our innovative technology has optimized grid utilization with state-of-the-art software and unique hardware technology. We continue to innovate and improve, ...

Heimdall Power provides an end-to-end solution to enable rapid digitalization of overhead power lines. The solution provides visibility and insight to critical line parameters and processed data streams; to be consumed as aggregated ...

At Heimdall Power, we are using our software and sensor technology to optimize power grids globally. And most importantly, we are having a lot of fun while doing it! Use this page to get to know us a little better, see our current available ...

Heimdall Power is at the forefront of grid innovation with our Dynamic Line Ratings (DLR) technology and Neuron sensors, which provide precise, real-time data to optimize power flow and maximize transmission line capacity. Our solutions enable utilities to increase grid efficiency, reduce congestion, and better integrate renewable energy, all ...

THE POSITION: As Head of Sales Europe, you will be pivotal in expanding our reach and impact across the continent. Your entrepreneurial spirit and leadership skills will be a key assets as you head our European branch to further success.

Arva started implementing Dynamic Line Rating solution from Heimdall Power in their grid back in 2018. 8 Heimdall Neuron sensors were installed on Arva's power lines enabling a windfarm with an installed capacity of 250MW to connect to the existing grid without delays. The installation of the Heimdall Neurons took only 2 days. Arva avoided a ...

Heimdall Power's vision is to optimize power grids globally. Since 2016 our innovative technology has optimized grid utilization with state-of-the-art software and unique hardware technology. We continue to innovate and improve, creating value for customers, shareholders and society. Our smart grid technology allows you to be the guardian of ...

Heimdall Power contributes to better utilization of the power lines and thereby a faster, cheaper and safer transition to a renewable power system. By using advanced sensor technology, algorithms and machine learning, Heimdall ...

Heimdall Power's grid monitoring technology combines the best of both worlds from software and sensors to deliver at the sweet spot of high accuracy and low cost. Our virtual sensors can be set up in minutes, while our physical sensors are easily installed on live power lines using a hot stick or our unique autonomous drone system.

Tom is a power industry veteran with over 35 years of experience. Tom spent over 18 years with Cooper

Heimdall power Denmark

Industries / Cooper Power Systems (now Eaton) in various sales management and executive roles. This included leading corporatewide efforts for utility substation and grid technologies and developing the early renewable and data center markets.

In Norse mythology, Heimdall is the all-seeing, all-knowing watchman who guards Asgard, the home of the gods. He possesses extraordinary abilities to see for hundreds of miles, hear the faintest of sounds, and stands vigilant at the Bifrost, the rainbow bridge connecting Asgard to the world of mortals, ready to sound the Gjallarhorn at the first sign of danger.

Heimdall Power's advisory board is a team of accomplished industry leaders and experts who offer invaluable guidance and support on our journey towards a fully digitized power grid. Their extensive experience from industry, politics and ...

Elvia will now use Heimdall Power's unique solution for system-wide grid monitoring to identify the available capacity in their service area. ... Our power grid covers roughly 50,000 km², equivalent to an area slightly larger ...

Heimdall Power Inc. is a Grid-Enhancing Technology company dedicated to provide the U.S. utility sector with world-leading services. Through our state-of-the-art software and sensors, we enable American utilities to release unprecedented benefits across their whole grid.

The greatest Viking history books; including Snorri's Edda, The Poetic Edda, and Heimdallargaldr, all attest that Heimdall is the protector and guardian of Asgard, the realm of the Aesir gods.. He resides, almost the ...
