

Large solar installation: 100 collectors with a total area of 260 m² Single-family building near Bielsko-Bia? a
Heat pump for house heating and cooling 11 kW, heat pump for swimming pool water 7.6 kW, photovoltaic installation 11 kWp, installation with 2 solar collectors.

The correct yet efficient operation of a solar thermal system is closely dependent on the flow rate of the working medium. The pump station is directly responsible for this. In addition to the circulating pump, it also contains measuring and safety components for the operation of the solar thermal system.

Moreover, ZPS 18E-01 ECO series unit is equipped with a solar controller, whose latest version software allows precise control of the solar collector system, as well as selected additional devices in the system. The ZPS 18E-01 ECO pump unit combines components as in a two-way unit, with simplicity of installation as in a one-way unit.

Connect the hydraulic connections of the pump and control unit with the solar collectors, the boiler, and the expansion tank, as shown in the schematic diagram of the installation (Fig. 3). c. Cold water connection should be done according to the presented schematic diagram of the installation (Fig. 3), or the schematic diagram of...

7. Installation schemes description 7.1 Tap water heating - controlling solar pump - scheme no.1 Controlling solar pump - P speed regulation disabled. Solar collector pump P will be switched on if temperature in collectors, measured by sensor T1, is greater than that measured by sensor T2 (in the bottom of the water...

Flat plate solar collector KS2600F TLP ACR distinguishes itself by maximum efficiency due to the use of anti-reflective glass. The laser welded absorber is made of high quality materials & ndash; aluminum and copper (Al-Cu). High efficiency is also achieved by application of ...

Hewalex at ISH, 13-17.03.2023 "Comfort from Nature" KOMFORT PLUS Kit - without hot water storage tank ; Solar kits ; Heat Pumps for Heating, DHW and Cooling ... Solar energy enables solar collectors to deliver cheap and clean heat, and photovoltaic modules to produce electricity. Heat pumps operate using the heat which surrounds us ...

The maximum of 15 pieces of collectors can be stacked on a wooden pallet. Collectors without the factory packaging are stacked on the pads. Transportation of collectors in a standing position. That is, the short side

horizontally, is allowed only when having the pallet full of collectors or when having solar sets factory packaged.

Consult HEWALEX Solar Collectors's entire HEWALEX catalogue on ArchiExpo. Page: 1/5. Exhibit with us {{¤cyLabel}} Back {{¤cyTemplate}} English. ... Use and construction of the pump and control unit The pump and control unit is designed to work with solar collectors in systems with required flow of the heat transfer fluid up to 18 ...

Flat plate solar collector KS2000 TLP is an uncompromised solution in terms of construction and parameters among flat plate collectors. The absorber is made entirely of copper (Cu-Cu) and welded with ultrasonic welding. High efficiency is achieved through highly selective coating (PVD), glass providing high permeability to solar radiation U1 and full thermal insulation of the casing.

Découvrez toutes les informations sur le produit : régulateur pour station de pompage GH26 de la société HEWALEX Solar Collectors. Contactez un fournisseur ou directement la maison mère pour connaître le prix, obtenir un devis et découvrir les points de vente près de chez vous.

Zespo?y pompowe ZP2-12 ECO powstaj? na bazie d?ugoletniego do?wiadczenia i wspópracy z fachowcami bran?y techniki solarnej. S? wytwarzane w zak?adzie produkcyjnym w Czechowicach-Dziedzicach. Grupy pompowe Hewalex podlega?y testom w laboratorium WILO Intec we Francji.

SPECIAL FEATURES OF HEWALEX SOLAR COLLECTORS Advantageous purchase prices and high heat yields - a positive economic effect Hewalex offers proven technical solutions characterized by very good "price/performance" indicators. As in the case of flat plate collectors of KS series, the highlyefficient evacuated tube collector KSR10 brings a ...

Hewalex solar collectors have been sold in Poland and abroad for more than 20 years. Comprehensive range of solar installations. KS2000 TP solar collectors can be used both in small installations and in large systems in public and industrial buildings and the like. The system can be configured for this purpose based on a comprehensive range of ...

In 30 years of our history, we delivered solar thermal collectors to over 150 000 buildings and objects in Poland and abroad. Over 150.000 solar thermal installations are successfully operating in small buildings, such as single ...
