

Heard Island is a major research site along the Antarctic Environmental Gradient (AEG). The AEG spans 30 degrees of latitude and includes a range of macro-climatic zones from cool temperate islands to the frigid and arid Antarctic continent. Conducted simultaneous studies on Heard Island and the Kerguelen Islands during the 2003-04 summer.

Due to the extreme isolation of Heard Island and McDonald Islands (HIMI), together with the persistently severe weather and sea conditions, human activities in the region have been, and remain, limited.

The McDonald Islands are small, rocky and actively volcanic. The islands are populated by large numbers of seal and bird species, and have been designated a nature reserve. There are 4 types of penguins that are located on Heard Island. With the only two active volcanoes in Australian territory the islands are situated on the Kerguelen Plateau.

There are no glaciers on the low-lying McDonald Islands. The largest glacier is the Gotley, which descends for over 13 kilometres from Heard Island's highest point (2,745 metres at Mawson Peak) to the south coast near Cape Labuan. It covered an area of over 27 square kilometres in the early 2000s. Glaciers dominate the landscape of Heard Island.

Heard Island and McDonald Islands Heard Island and McDonald Islands are uninhabited, barren, Subantarctic islands in the Southern Ocean, far due south of India and roughly 400 km southeast of Kerguelen of the French Southern and Antarctic Lands.

Human activities at Heard Island and McDonald Islands (HIMI) have a relatively short but diverse history. Wild and isolated Heard Island currently has no resident population but this has not always been the case.

Advanced 9BB Half-Cut solar cells with PERC technology provide efficiency up to 23.4% (up to 21.5% module efficiency). Combined with its less than 0.5% annual power degradation, higher energy yield, and 25-year power warranty, Ultra lets you recoup your ROI much faster resulting in more long-term energy and savings than ever.

Located in the Southern Ocean, this Australian external territory comprises mainly two volcanic islands, Heard Island and the McDonald Islands, featuring stark volcanic landscapes, glaciers, and the highest

mountain in Australian territory, Mawson Peak. Significance.

Office Address Board of Radiation & Isotope Technology, BRIT-BARC Complex, Sector 20, Vashi, Navi Mumbai-400703, India Office Time 9.00 Hrs to 17.30 Hrs - Tuesday to Saturday

Heard and McDonald Islands 2020 Conservation Outlook Assessment SITE INFORMATION Country: Australia Inscribed in: 1997 Criteria: (viii) (ix) Heard Island and McDonald Islands are located in the Southern Ocean, approximately 1,700 km from the Antarctic continent and 4,100 km south-west of Perth. As the only volcanically active subantarctic islands

Map of Heard and McDonald Islands Map of the islands. The geography of the Heard Island and McDonald Islands (HIMI) refers to the geography of Heard Island and the McDonald Islands, one of the most remote places on earth. The islands belong to Australia and are located 4,000 kilometres (2,485.5 mi) southwest of the mainland in the Southern Ocean. These subantarctic ...

The two small triangles are the McDonald Islands, mostly small rock islands and not nearly as impressive as Heard. I know that they probably are not as green as on the flag, but I simply didn't want to have grey on there. Lastly there's the southern cross from the Australian flag, following the lead of Christmas Island and the Cocos Islands.

Heard Island and McDonald Islands are located in the Southern Ocean, approximately 1,700 km from the Antarctic continent and 4,100 km south-west of Perth. As the only volcanically active subantarctic islands they "open a window into the earth", thus providing the opportunity to observe ongoing geomorphic processes and glacial dynamics.
