Why are lithium-ion batteries so important in Chile?

The global boom in electric vehicle productionhas sent demand for lithium-ion batteries soaring. That's turned Chile's vast, lithium-containing salt flats into a vital national resource. In Chile's Salar de Atacama, near the border with Argentina and Bolivia, close to one-third of the world's lithium is produced from brines.

Is lithium a critical energy resource in Chile?

The global and regional significance of lithium as a critical energy resource is examined. The evolution of Chile's lithium industry is analyzed, emphasizing two recent key policy initiatives: the 2015 National Lithium Commission report and the newly launched national lithium strategy. The salient features of these initiatives are outlined.

What's going on with the lithium industry in Chile?

BARTLETT: She says that the once-reliable crops are failing, and animals are getting ill, meaning that their traditional ways of life are disappearing without a trace. The Chilean government has rolled out its national lithium strategy, meaning that production of the metal will be expanded and part nationalized.

Does boric want Chile to invest in a battery supply chain?

Boric also wants Chile to invest in downstream processingfor the battery supply chain. Chinese EV giant BYD reportedly has plans to build a \$290 million cathode-manufacturing facility in Antofagasta, and the government has given it preferential prices on lithium carbonate, the input for cathode material.

Is lithium mining destroying Chile's communities?

LEILA FADEL,HOST: In northern Chile,lithium mining is booming. The metal is used for batteries in everything from cell phones to electric cars, and it's crucial for the transition away from fossil fuels. But as John Bartlett reports, it's tearing apart the communities who have lived on the land for millennia.

Is lithium a mineral in Chile?

In essence, lithium has a unique status in Chile, similar to hydrocarbons. Under Chilean law, lithium is considered a strategic mineral belonging to the state of Chile, and exploration and operations can only be carried out under special operation contracts (CEOL). 3.2.
