

Does Enphase support home assistant?

While Enphase doesn't officially support Home Assistant, there is a great integration built into the core that is relatively well maintained. Over the following sections, we will walk you through the process of connecting your Enphase power system to Home Assistant. We will also show you how to add Enphase to the Home Assistant energy dashboard.

How do I connect Enphase envoy to home assistant?

The Envoy must be on your local network with IPV4 connectivity from Home Assistant. Envoy firmware version 3.9 or newer. an Enlighten cloud username and password. Home Assistant 2023.9 or newer. To add the Enphase Envoy integration to your Home Assistant instance, use this My button: Enphase Envoy can be auto-discovered by Home Assistant.

Which Enphase sensor works with energy dashboard?

For 'Solar Production', the `today_s_ENERGY_production` sensor is the ONLY enphase sensor that will work with energy dashboard by default without modifying home assistant and creating extra power and energy sensors. This is due to the `state_class: total_increasing` attribute that ONLY this sensor appears to have.

Can Enphase envoy be auto-discovered?

Enphase Envoy can be auto-discovered by Home Assistant. If an instance was found, it will be shown as Discovered. You can then set it up right away. This integration will offer various sensors depending on the configuration of your Enphase system. Sensors are available for the following:

How long does Enphase data take to show up?

31. With all your Enphase data now being piped into the Home Assistant Energy dashboard, you will have to wait two hours before anything is displayed. Below, you can see what this data might start to look like as Home Assistant aggregates all of the data.

What is `home_assistant_Enphase_envoy_installer`?

GitHub - vincentwolsink/home\_assistant\_enphase\_envoy\_installer: This is a HACS custom integration for Enphase Envoys with firmware version 7 and up. This is a HACS custom integration for enphase envoys with firmware version 7 and up. Especially made to provide extra functionality with your installer or DIY account.

In my experience, I have a 12 month token for home assistant to talk to envoy and I generate a separate token whenever I access `https://envoy.local` from my browser. ... Enphase Envoy with Energy Dashboard - #729 by del13r. Total-consumption is actually what your house consumed. It includes both what your house used from the grid as well as what ...

# Home assistant enphase dashboard Denmark

It could provide Power production in total or power production for each phase if you have a 3 phase system. Hopefully it will not perform an automatic upgrade of the firmware as I don't know how to block it. If it will then I need to find out how to translate the power production sensor data in another sensor with the same data so I can use that one for feeding the Solar ...

When I go to the initial screen of the Energy dashboard, it has a series of prompts...and it has the sensors from my enphase system, but they are cumulative sensors: should I choose one of these (today, 7 day, lifetime...

Enphase Envoy with Energy Dashboard Share your Projects! ... Ok, so, all of this recent activity started when when Home Assistant 2021.8 laun... ned786 (Ned786) March 21, 2022, 7:45am 489. Thank you so much for the detailed response! i am simply trying to setup my energy dashboard. i will make the new sensors and use them instead. ...

There are a lot of threads, with a LOT of information... but no tutorial of current best practices that collects any of it into a single place. My first step is just to get all the necessary sensors into ...

I know there is a lot of confusion with all of the forks of the Enphase integration because of the authentication switch with the update to firmware 7.x. I was able to solve this using the REST sensor - no enphase integration needed. Get a Token All local API access now needs a token to use. For some reason the website to get the token does not work for me. So if you try ...

Does anybody in this topic "Enphase" has a home battery which you want to add to the Home assistant dashboard. The Enlighten app is showing in it's "live status" view the charge or discharge rate of the battery but there are no counters exposed (apart from the current battery percentage / capacity etc...).

Hello Enphase owners, In August 2021, I wrote a topic on the Home Assistant Community forum about a solution I came up with to get my Enphase Envoy working with the Energy Dashboard feature which had just been introduced at the time. That topic had a lot of great discussions, good ideas and many opportunities to help others.

The energy dashboard does not show solar going to the house, while the enphase does. If there something I have not configured correctly? Home Assistant Community Energy Dashboard vs Enphase. Configuration. Frontend. energy. darthrater (Nathaniel) December 13, 2023, 3:17pm 1.

dashboard. The Enlighten app is showing in it's "live status" view the charge or discharge rate of the battery but there are ...

Enphase Envoy with Energy Dashboard. Share your Projects! del13r August 10, 2021, 12:13pm 21. The Enphase Envoy updates every 60 seconds. ... I assume that home assistant processes the configuration.yaml in ...

At the moment I'm using @del13r's code to use the official enphase integration for the energy dashboard and tariffs. I'm not doing anything with the mqtt sensors that are updating every second yet but am considering the live cost view, 3 ph voltage plots and if I would benefit from a higher resolution energy plot.

I'm trying to configure the Energy dashboard using my Enphase integration. I found a list of which entities to use for consumption, return to grid, etc. here. But the entities it mentions are missing from the drop down. I don't even see them under Settings -> Integrations -> Enphase Envoy. Here are my entities Here are the entities available in the dropdown for ...

How do you set up Enphase Envoy in Home Assistant? Home Assistant finds the Envoy, but gives an "unexpected error" during configuration. The default documentation says the user name is envoy and the password is blank.

I maintain the Enphase Envoy sensor code in Home Assistant (or atleast try to been bust the last few months) just getting back to it now and trying to get the Return to Grid values to correctly appear in Home Assistant. ... This combining of the data is what makes it a inaccurate source for home assistant energy dashboard. Once we subtract ...
