

How do I store backups outside of home assistant?

Storing backups outside of Home Assistant makes sure they don't use space on Home Assistant to begin with. It also makes sure you can restore Home Assistant from backup in case you have an issue with your current installation. Go to Settings > System > Backups, and from the list of backups, select the backup you want to keep.

How do I expand my home assistant storage?

When you are running Home Assistant Operating System, you can use the following options to expand your storage: Replace your current storage medium, for example, the SD card, with a bigger one. Use a backup to restore Home Assistant from backup on the new SD card.

How do I restore home assistant to a new SD card?

Use a backup to restore Home Assistant from backup on the new SD card. If you are running Home Assistant as a VM, look at the documentation for your hypervisor on how to expand disks for virtual machines. Home Assistant will auto-expand to use the newly added space.

How do I delete old backups in home assistant?

To delete old backups, follow these steps: Go to Settings > System > Backups. From the list of backups, select all the ones you want to delete, then select Delete selected backups. This clears up space in Home Assistant. Storing backups outside of Home Assistant makes sure they don't use space on Home Assistant to begin with.

Does home assistant auto-expand?

If you are running Home Assistant as a VM, look at the documentation for your hypervisor on how to expand disks for virtual machines. Home Assistant will auto-expand to use the newly added space. Suggest an edit to this page, or provide/view feedback for this page.

Home Assistant is open source home automation that puts local control and privacy first. Powered by a worldwide community of tinkerers and DIY enthusiasts. Perfect to run on a Raspberry Pi or a local server. Available for free at [home-assistant.io](https://home-assistant.io).

By default, Home Assistant records everything in the database. If you don't need that much history, then don't record it. (See Recorder Integration). Also, if you don't need the history, you can safely delete the database (`home-assistant_v2.db`). Home Assistant will start a new one and when it fills up your storage, you can delete it again.

List of the built-in integrations of Home Assistant. List of the built-in integrations of Home Assistant. 2024.12.2 Getting started; ... Intelligent Storage Acceleration; Intent Script; Intergas InComfort/Intouch

Still a workaround though. It's a native capability. A State Object has a state value, constrained to storing a string limited to 255 characters, and an attributes value which is a dictionary, able to store key-value pairs of any type.. All entities store their information, in the state machine, as a State Object. It's just a matter of choosing something that allows you to easily ...

I am going to buy new electric radiators, living in Norway. Looking for radiators with weekly program (mode: night/day temperatures - workdays/weekend ) that can be overwritten by local control using HA. What the best brand for local control with Home Assistant? So far my Mill is out due to their Wi-Fi problems. Any experience with Namrons Zigbee panels?

Choose Configuration tab (at the top), mine had 4 balloons above the "ignore pattern" box including .storage which I removed by pressing the x then clicking SAVE at the bottom right. This prompted a restart of the add-on. Following this the .storage folder was visible in my file editor under config/ and I was able to access the files.

As I understand it, once a HassOS image (either for an RPi or for a VM) is initialized, it cannot expand the size of the partition it uses. This is a problem if one needs to add storage - easy enough to move the image to a larger SD card or allocate more space to the VM, but neither does anything if HassOS doesn't expand its

internal partitions. I know for VMs ...
