As the world continues to shift towards sustainable energy sources, more and more homeowners in Indonesia are considering solar panels as a way to power their homes. With the abundance of sunlight in the country, solar panels are a practical and eco-friendly option for generating ...

Staying On-Grid On-Grid solar system is an installation connected to the utility grid. If your system produced more energy than what you actually need, excess energy will then be sold to your electric company. This means that your home is basically connected to the power lines, making your local utility as your battery so to speak.
