What is the energy sector in Antigua and Barbuda?

The energy sector in Antigua and Barbuda is exclusively based on the combustion of fuel. There are no refinery processes active in Antigua and Barbuda, resulting in no fugitive emissions from primary and secondary fossil fuel production.

What is Antigua & Barbuda's energy policy?

Antigua and Barbuda published a draft of its National Energy Policy in December 2010, with the dual goals of reducing energy costs by diversifying away from fossil fuels and driving development of new technologies and sectors.

How is electricity produced in Antigua and Barbuda?

Electricity generation in Antigua and Barbuda is entirely from fossil fuels. Petroleum is used extensively, mainly for electricity production and transportation.

Will Antigua and Barbuda build a waste to energy plant?

Antigua and Barbuda intends to construct and operationalize a waste to energy (WTE) plant by 2025. By 2020, they aim to finalize technical studies for this project. In 2006, land use change and forestry contributed 7% of national emissions, which can be mitigated through the removal of GHG emissions by carbon sinks.

Who owns the power in Antigua & Barbuda?

Under the terms of the deal, the Antiguan government will retain a 51% share in WIOC.<sup>10</sup> Antigua and Barbuda's generation resources are owned primarily by APUA, with the remainder owned by the sole independent power producer (IPP) currently in operation-- Antigua Power Company Limited (APC); other IPPs are allowed but none exist to date.

Is Antigua and Barbuda an economic powerhouse?

In 2014, Prime Minister Gaston Browne vowed to transform Antigua and Barbuda into an economic powerhouse and signed an agreement with Chinese investor Yida Zhang for USD 740m investments. Yida International Antigua Limited now owns thousands of acres of land in the country, located in its largest marine conservation area.

Electricity generation in Antigua and Barbuda is entirely from fossil fuels. Petroleum is used extensively, mainly for electricity production and transportation. The privately-run Antigua Power Company Limited (APCL) supplies around 80% of the power generated in Antigua and Barbuda; whilst the Antigua Public Utility Authority (APUA) is ...
