

How big a roof can be used for photovoltaic panels

How many solar panels can be installed on a roof?

Your roof will need to be large enough to fit a suitable number of solar panels, as there's rarely much point putting just two or three panels up there. The average solar panel takes up 2m², and your installer should leave around 40cm on each side of the array, as well as 3cm between every panel.

Is my roof big enough for solar panels?

Whether your roof is big enough for solar panels depends on the size of the array you want installed. You can also look at our other resources to see how many solar panels you may need for your particular house size and roof. For a standard 4kW size system you would need around 28 square meters of clean roof space.

How much weight can a solar roof hold?

Installers must only fit solar panels if they're sure your roof can hold their weight, and carry on doing so for up to 40 years. Fortunately, most roofs in the UK are built to hold much more than a solar panel system, which usually weigh around 20kg per square metre when everything's included.

What is the best roof pitch for solar panels?

What's the best roof pitch for solar panels? The best roof pitch for solar panels is between 30-40°, but the angle of the roof can fall outside of this range and generate electricity effectively. Solar panels can still absorb sunlight even when horizontal.

Can you install solar panels on a roof in the UK?

The majority of UK homes have a roof suitable for solar panel installation. Great news for anyone looking to generate their own renewable electricity. If you'd like to speak to an MCS certified (or equivalent) solar installer for advice - you can get free no-obligation quotes from up to 4 solar installers in your area using Solar Guide.

Are solar panels good for small roofs?

Many solar panel companies make small solar panels designed specifically for small roofs. You can also opt for high-efficiency solar panels that have conversion rates as high as 23% (compared to the industry average of 18%). Here is the average solar panel dimensions in the UK: What is the average power of a solar panel?

If you only use 100-watt solar panels, you can put 103 100-watt solar panels on the roof. If you only use 300-watt solar panels, you can put 34 100-watt solar panels on the roof. If you only use 400-watt solar panels, you can put 25 100 ...
