

# How high should photovoltaic panels be erected for construction

How high can a PV system be installed on a roof?

PV system installed on roof should not exceed 2.5m high. PV system exceeding the height of 1.5m should be certified by an Authorized Person who is registered under the Buildings Ordinance for submission of a safety certificate to the Lands Department for record. The average imposed load should not exceed 150kg/m<sup>2</sup>.

Do you need planning permission to install solar panels on your roof?

An increasing number of people are investing in solar energy. More and more homes are having solar panels, or solar tiles, installed on their roofs. Of course, with such installations, the topic of planning permission and building regulations often comes to the surface.

Can a solar panel be installed on a roof?

If you wish to install a solar panel on your roof building regulations will normally apply. The ability of the existing roof to carry the load (weight) of the panel will need to be checked and proven. Some strengthening work may be needed. Building regulations also apply to other aspects of the work such as electrical installation.

Can solar panels be installed on a wall?

Class A allows for solar panels to be erected on residential properties subject to a few conditions. The most important factor is that you must keep the solar photovoltaic (pv) or better known as a solar panels or indeed solar roof tiles within 20cm of the wall or slope of the roof. Yes, you can install them on a wall if you want.

How high should a PV system be?

PV system exceeding the height of 1.5m should be certified by an Authorized Person who is registered under the Buildings Ordinance for submission of a safety certificate to the Lands Department for record. The average imposed load should not exceed 150kg/m<sup>2</sup>. PV system should not project more than 750mm from external wall.

Can I install solar panels if I don't meet building regulations?

Your local authority can also apply for a Confiscation Order to take away any money you've earned with your system - so there's absolutely no benefit to installing solar panels that don't meet building regulations. It's crucial that your solar installation follows all building regulations.

To read more about the costs of solar panels, check our recent guide on solar panel costs. What is the payback period for a solar farm? It generally takes between five to 10 years to pay back the money you've ...

Solar panel scaffolding refers to the temporary structure erected to support workers and materials during the installation, maintenance, or removal of solar panels. It's designed to provide a safe and stable working
