#### What is invt solar inverter?

INVT solar inverter has a unique product technology advantage in product stability, power efficient transformation, low harmonic current harmonics and grid security access, which can be widely used in BAPV (home roof, office roof, factory roof), and BIPV.

#### What is a solar PV inverter?

A solar PV inverter is an electronic device that converts DC voltage into AC voltageof required magnitude and frequency. In solar PV applications, inverters are used to power equipment and devices that operate from an AC source. The DC to AC conversion is required as solar PV systems generate and store energy in the form of DC voltage and current only.

#### Who is int solar?

INVT Solar is a professional solar inverters manufacturer and national high-tech enterprise. Founded in 2015, it is a wholly-owned subsidiary of INVT. It mainly offers PV inverter solutions and energy storage systems for commercial &industrial, and residential applications.

## How does a photovoltaic inverter work?

The photovoltaic is connected to a DC-DC converterwhich is connected to the DC terminals on the inverter. The DC link capacitor is consisted of a small value film capacitor. The properties of the inverter are listed in Table 1. The phase lock loop (PLL block) in is used to generate the three reference currents for the system control. Fig.1.
