

# How to distinguish the authenticity of Jinao photovoltaic panels

Are Jinko Solar panels good?

Jinko Solar is an excellent solar manufacturer that has earned its place as one of the biggest in the business. Its high-quality panels perform well and come with great warranties. You're unlikely to have any problems with your panels; not only is solar panel failure rare, but Jinko Solar panels are as reliable as they come.

How do I verify my Jinko Solar modules?

Solar system installers and home owners can now use the Jinko international app to verify the authenticity of their Jinko Solar Modules. Solar system installers and home owners can now use the Jinko international app to verify the authenticity of their Jinko Solar Modules.

How long will Jinko Solar be around?

Based on Jinko Solar's huge size and profitability, we expect it to be around for many years; the same can't be said for many of its competitors. Finally, there is the ever-important matter of cost: Jinko Solar's panels are much cheaper than the priciest brands.

What is the temperature coefficient of Jinko Solar panels?

Jinko Solar panels have temperature coefficients ranging from -0.39 to -0.35. Whether you're buying a TV, a car, or solar panels, the manufacturer should stand behind their product with a strong warranty.

What is a Jinko Eagle solar panel?

Jinko's Eagle Series is the product line available to American homeowners. It includes two models: The Eagle G4 is a mono PERC module that uses half-cut cells and Jinko Solar's "tilting ribbon" (TR) technology. This tech features a special round busbar, allowing more cells to be packed onto a single panel.

Are Jinko G6 solar panels a good choice?

Jinko's 54-cell Eagle G6 panels have power ratings between 420 and 440 watts and impressive efficiency ratings of 22.53%! SolarReviews expert take: The Eagle G6 panel is a good option for homeowners with limited roof space, as the modules are highly efficient. But that efficiency likely comes at a higher price tag. Jinko's overseas models.

NOTE: The cost to produce a watt of solar energy has dropped from around \$3.50 per watt in 2006 to \$0.50 per watt in 2018. Micro Inverters. Microinverters convert DC to AC at the panel ...
