

# How to install lighting fixtures on photovoltaic panels

How to install solar light fixtures?

Clear any debris or obstacles that may hinder the installation process. Ensure that the ground is level and stable to provide a solid foundation for the light fixtures. Taking the time to prepare the area will ensure a smooth and secure installation. Now comes the exciting part--installing the solar light fixtures.

How do I install solar powered lights?

If you're putting DIY solar powered lights in a vehicle or insulated building, I'd recommend using a solar cable entry gland. Locate the solar terminals on your charge controller. They are usually labeled with a solar panel icon or the letters "PV".

How do I choose a solar light installation site?

Ensure your solar light installation site is free of obstructions from access to the sun. Also, you'll want to ensure there aren't foreign light sources that can interfere with the panel's light sensor. Keep the pole away from heat sources and ensure it's on level, solid ground (we can accommodate if the soil isn't the most sturdy).

How do I make a solar light?

Here's a step-by-step guide to making a simple, basic solar light. Start with the solar panel. This will typically come with certain specifications, such as voltage and wattage. A 6V solar panel is ideal for charging a 1.2V Ni-MH battery.

How to install a solar street light?

Solar street light installation requires strength, so it's safer to do it while you are on the ground. If you are unsure how to connect the battery to the panels, look for pre-assembled options. The mounting point is usually on the pole's top, so you should use the ladder to reach it.

Does a solar light come in a box?

All the components of a solar light come included in one box. This, however, doesn't mean that all the tools you'll need to properly install the light come with it. Here's what comes shipped in the box: Ensure your solar light installation site is free of obstructions from access to the sun.
