

How to install lights in lockers

What lighting fixtures do I need for my locker room?

At LED Lights Direct, we offer a wide range of lighting fixtures, including linear LED lights, round LED lights, and magnetic track pendant sets, to suit your locker room lighting needs. For more information or to discuss your lighting requirements, please contact us:

How to make a locker room glare-free?

A glare-free light source can be obtained by using LED lights for locker rooms. Additionally, the use of diffusers can further soften the overall lighting, enhancing visual comfort. Another important consideration is the proper placement of fixtures.

What equipment do I need for a locker installation?

For your locker installation, you will need a spirit level, spanner, drill and handling equipment. Fixings, nesting nuts and bolts will be provided. Ideally, two people are required to do an installation especially if the lockers are front heavy such as glass or laminate lockers. Suitable PPE may be required for safety reasons.

How do I choose a locker?

You also need to consider the position of any windows or doors. Make sure your lockers will not block access to any windows or doors which still need to be opened. Take note of things like skirting boards, radiators, heating pipes, light switches, and sockets etc. Make sure you install on a strong, level and even surface, are the floors level?

Does locker room lighting have glares?

When it comes to locker room lighting, addressing the issue of glares is crucial in choosing and designing the lighting plan. The presence of mirrors in this area creates a high potential for blinding glares as the light reflects off these surfaces.

How do you secure a locker?

A single run of lockers must be secured to a suitable anchor point with a suitable bracing mechanism. Lockers on stands or seat/stands should be fixed down to the stand or seat/stand as well as side to side and back to a wall or run of lockers.
