Can solar panels be mounted vertically on a wall?

An emerging trend in home solar energy is mounting solar panels vertically on fences and boundary walls. This ingenious approach capitalises on unused vertical space and offers many advantages, ranging from amplified energy production to elevated property aesthetics. Almost everything about mounting panels on a wall applies here, too.

How do I install a solar photovoltaic system?

The most efficient way to install a solar photovoltaic system is by using a Heliomotion. Simply because a Heliomotion has innovative sun-tracking technology that enables solar panels to track the sun throughout the day and year. The possibilities for mounting solar are endless.
