

Solar energy has become a crucial part of the renewable energy landscape, providing clean power to homes and businesses around the world. However, one of the limitations of solar energy is that it is dependent on sunlight, which means that solar panels can only generate power during daylight hours.

And we feel that humanity is just beginning to understand the potential of commercial space. Space still feels new, but humanity has had this feeling before, first journeying into new land tens of thousands of years ago, then exploring the oceans, then the skies.

Turning night into day is something big meteors can do, but it might (one day) become as easy as firing up an app and tapping a spot on the map.. Reflect Orbital is a California-based startup that aims to sell sunlight and energy after the sun has set. They're doing it by sending a big mirror into space, aboard a satellite that's able to point said mirror in such a way ...

Selling sunlight? What you mean? who are gonna use it? and what the hell is THIS? Reflect Orbital is a pioneering startup based in Alameda, California, that aims to revolutionize the solar energy landscape by deploying space-based reflectors to deliver sunlight to solar farms, municipalities after dark.Founded in 2021, the company is addressing one of the ...
