

Hubble energy Namibia

Who is Hubble energy?

Since our inception in 2020, Hubble Energy, previously known as Hubble Lithium, has been at the forefront of revolutionising the energy landscape in South Africa. With a focus on cutting-edge Battery Energy Storage Systems (BESS) and a commitment to sustainability, we have swiftly become a trusted name in the Lithium Battery Supplier industry.

Why is Hubble based in South Africa?

The company was established in South Africa to solve South African problems, using South African skills. It is clear that local research and development capability, from local engineers, gives Hubble an edge.

What makes Hubble energy different?

Hubble Energy supplies advanced energy storage solutions capable of powering homes, businesses, or commercial spaces. What separates the company from the rest is its South African heritage. The company was established in South Africa to solve South African problems, using South African skills.

What services does Hubble offer?

Hubble offers service and accessible assistance nationwide to resellers and end-users alike with a dedicated in-house technical support & service team. Hubble Energy is a leading battery manufacturer that designs, engineers and supplies lithium storage solutions from homes to large commercial applications.

Which prismatic cells are used by Hubble energy?

We only use the highest quality prismatic cells from leading manufacturers. This includes BYD and CATL prismatic Li-ion cells, which are known to be the leaders in high quality lithium cells. We are thrilled to announce the launch of Hubble Energy's next-generation Container Solutions.

Is biomass a source of electricity in Namibia?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Namibia: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

Hubble Energy batteries are fully compatible and approved by Deye. Deye inverters are hybrid inverters with a large range of features that provides great flexibility for installers. The following field guide will assist with the correct ...

Namibia: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across ...

Hubble energy Namibia

Hubble's High Voltage applications range from game lodges to salt pans. With the increasing power and climate crisis, alternative energy solutions are vital to keeping in business. Large scale businesses require mega scale energy sources and Hubble's High Voltage Systems are designed to provide unprecedented power, ranging from 20kWh - 2 ...

The Hubble High Voltage System uses innovative technology to bring you an easily upgradeable solution, with a smart BMU that automatically detects the number of modules connected. It is easy to transport and install with a modular, buildable design that fits into standard server cabinets.

Complete Package: The Hubble AM-5 Lithium Battery package includes a Battery Link, rawl bolts, and a wall bracket, making installation and setup a breeze. Hubble Cloudlink Ready: Stay in control of your energy system with Hubble Cloudlink compatibility.

The Hubble range of batteries communicate to inverters using the CAN port. The Axpert type inverter range does not have a CAN bus communications port. Although it does have a Modbus port, we do not support Modbus. CAN bus ...

Discover Hubbell renewable energy solutions in our product guide. See our full product offering for inside the fence applications on solar arrays, wind turbines and collector systems. Everything from fittings, grounding, enclosures, controls, power quality, and enclosures. We even create advanced sensors to keep you informed of energy plant health.

The Hubble Cloudlink App Has a Brand-New Interface When we launched the Hubble Cloudlink App in October of last year, we knew this was just the beginning for the innovative platform. As a company that strives to lead the way in an ever-changing industry, we were already dreaming up ways to make the Cloudlink experience even more seamless. And ...

The Hubble range of batteries communicate to inverters using the CAN port. The Axpert type inverter range does not have a CAN bus communications port. Although it does have a Modbus port, we do not support Modbus. CAN bus communication is optional for Hubble and Axpert and the Hubble range of batteries work very well without communications.

The Hubble training team is currently in Namibia, offering installer training in collaboration with Pupkewitz Megatech Renewable Energy Solutions on our low voltage, high voltage, and ...
