

How much solar power does Hungary have in 2023?

Hungary deployed 1.6 GW of solar in 2023, according to new figures released by the Hungarian government. Last year's increase is a calendar-year record for Hungary and more than one and half times the capacity additions recorded in 2022. It takes the country's total solar capacity to more than 5.6 GW.

How big is solar power in Hungary?

Solar momentum is building in Hungary with almost 4 GW of generation capacity, more than 2.5 GW of which is from arrays bigger than 50 kW in scale, according to data published in December by the Hungarian Energetic and Public Utilities Regulatory Authority. Attila Keresztes, CEO of Astrasun Solar.

Why is solar power growing in Hungary?

Solar power in Hungary has been rapidly advancing due to government support and declining system prices. By the end of 2022 Hungary had just over 4,000 megawatt (MW) of photovoltaics capacity, a massive increase from a decade prior. Relatedly, solar power produced 12.5% of the country's electricity in 2022, up from less than 0.1% in 2010.

What percentage of electricity is generated by solar energy in Hungary?

In addition to Hungary, the focus here is on Romania and Greece. At present the proportion of renewable energies in electricity generation in Hungary is around 13 percent - with solar energy accounting for only one to two percent. By way of comparison, in 2019 the corresponding figures for Germany were 40.2 and 7.4 percent respectively.

Who are Ventus energy?

Group companies are regulated electricity and heat (CHP) producers based in Latvia. We trade produced electricity in the leading power market in Europe - Nord Pool exchange. Ventus Energy clients are large electricity consumers and/or traders, ensuring a stable and predictable revenue stream.

What happened to Hungarian solar power plants?

In October, the Hungarian government introduced a provision for small, household-sized solar power plants that fundamentally transformed the Hungarian solar market. Since Oct. 31, the aforementioned, sub-50 kW, grid-connected household systems could no longer have a grid connection and could only be used for self-consumption.

Ventus ha prestado también servicios a otra Central Generadora, de origen solar fotovoltaico de Atlas Renewable Energy: Parque Solar Fotovoltaico El Naranjal de 57,46 MWp instalados. En este caso, el parque se conecta a la Red de Trasmisión en Alta Tensión (150 kV).
