Hyme energy Lithuania

What is Hyme energy?

Hyme Energy has developed a novel thermal energy storage solutionbased on the use of molten hydroxide salts as a storage medium. We store large amounts of energy,in the order of GWs,to dispatch as power and heat. Storage facilities will be built for use in utilities and in the industrial sector including fertilizer production.

What is Hyme technology?

Hyme's technology is built for industries that depend on large-scale heat. Our solution reduces emissions,lowers costs,and boosts efficiency. We are deploying storage solutions in several locations,helping industries transform their energy use,one project at a time.

What is Hyme thermal energy storage?

Hyme's thermal energy storage system provides clean and reliable process heat,supporting industries and utilities in their decarbonisation journeys. Based in Copenhagen,Denmark,Hyme operates in three dedicated spaces - a modern office,a chemistry research lab,and a prototyping and testing facility.

How many investors does Hyme energy have?

Hyme Energy has 6 investorsincluding EIC Accelerator and Heartland. How much funding has Hyme Energy raised to date? Hyme Energy has raised When was the last funding round for Hyme Energy? Hyme Energy closed its last funding round on Feb 28,2024 from a Grant round.

When did Hyme energy close?

Hyme Energy closed its last funding round on Feb 28,2024from a Grant round. Who are Hyme Energy's competitors? Alternatives and possible competitors to Hyme Energy may include Evergen,Aquion Energy,and Ore Energy.

European Energy Lithuania, UAB (kodas 305812282) buvo ?kurta 2021-06-30. Pagrindin? ?mon?s veikla yra statyba. ?mon? valdo 1 akcininkas (?mon?). 2023 metais European Energy Lithuania, UAB pardavimo pajamos siek? 1 733 527 Eur, o nuostolis prie? mokes?ius buvo -75 199 Eur. Naujausiais Sodros duomenimis, ?mon?s darbuotoj? skai?ius ...

Lithuania Total Energy Consumption. Total energy consumption per capita is 2.4 toe and 4000 kWh for electricity (2022); those consumption rates are 18% and 27% below the EU average, respectively. Graph: CONSUMPTION TRENDS BY ENERGY SOURCE (Mtoe) In 2022, total energy consumption dropped by 12% (6.8 Mtoe), after rising by 2% between 2015 and 2021.

Hyme Energy aims to accelerate the transition towards a fossil-free energy future by bringing affordable industry-scale molten salt energy storage to market. The company is currently building its first industry scale

...

Our team of world-class chemistry and materials science experts is breaking new ground in high-temperature molten hydroxide storage. Using our own salt treatment methods, we"re scaling ...

These developments are regarded as the beginning of a new era for Lithuania"s energy security as the country seeks to become a self-sufficient energy producer and exporter in the future. With the number of prosumers increasing remarkably in 2023, this change is also crucial to ensure the sustainable development of the sector. ...

Studying Energy Engineering in Lithuania is a great choice, as there are 4 universities that offer Master"s degrees on our portal. Over 7,000 international students choose Lithuania for their studies, which suggests

you"ll enjoy a vibrant and culturally diverse learning experience and make friends from all over the world.

At Hyme, we"re not just working -- we"re on a mission for a greener future. If you want a career with purpose and the chance to make a real difference, we"d love to hear from you. A word from our team "Working in thermal energy storage ...

Danmarks Eksport- og Investeringsfond ser store potentialer i startuppen Hyme Energy, der er langt fremme med teknologi til lagring af sol og vindenergi i termiske energilagre baseret på smeltet salt.

o Lithuania"s Energy Vision aims to achieve self-sufficiency in electricity generation by 2035 and transition to 100% renewable energy as soon as possible while maintaining affordability, reliability, and energy security. o The Lithuanian Energy Agency (LEA) is partnering with the
