Which solar panels should I buy in Indonesia?

Most solar installers in Indonesia usually recommend panels made by "Tier 1" solar panel manufacturers. The Bloomberg New Energy Finance uses this tiering system as a measure of a manufacturer's reliability and consistency. The prices of "Tier 1" solar panels vary based on where they are manufactured, their efficiency and warranty durations.

What are the best solar panels for landed homes in Indonesia?

The most popular solar panel brands in Indonesia are typically the more affordable top Chinese manufactured panels in the list such as LONGi, Jinko, Trina, JA Solar, etc. Here's a rough estimate of the standard system cost for landed homes in Indonesia. Remember that installation costs will also vary depending on the above factors.

How much does solar maintenance cost in Indonesia?

We encourage solar homeowners to schedule an annual maintenance visit for your solar system, similar to air-conditioners. Your installers can both clean your solar panels and conduct tests on your inverters and breakers. Maintenance costs for your solar panel system usually range from 700k to 1 mil. IDR per visit in Indonesia.

Who is solar power Indonesia?

Solar Power Indonesia aims to design systems that fit seamlessly into your lifestyle, reducing your costs, providing you with long term power security and reliability, while also minimizing your environmental impact. Solar Warrior is an EPC company providing all in one solar panel installation and service.

Why should you choose solar panels in Indonesia?

Solar panels in Indonesia are now more affordable than ever, making it both financially and environmentally attractive. By using solar power you can save on your electricity bills and reduce your CO2 emissions at the same time! It is also a great way to be energy-independent, shall you decide to go with an off-grid solar system.

Can solar panels be installed on a roof in Indonesia?

Solar panels can be installed on almost all roofs. That said, your roof's material and type determine if additional materials for installation (such as racking and mounting systems) are needed -- which will add to your installation cost. In Indonesia, most roofs are pitched and tiled, though a small proportion use metal sheet or flat concrete.

To offset as much CO2 as possible, by displacing dirty grid power with your own solar energy. Offset your typical yearly home electricity consumption with the solar system. Or you may have just limited space and want to install as much solar as possible on it. Whatever your goal and requirement, we will work with you to identify the best solar ...
