

Will Prony resources develop a photovoltaic project in New Caledonia?

TotalEnergies says it will develop a series of photovoltaic (PV) and energy storage projects in New Caledonia for Prony Resources' operations in the country.

How does Prony resources contribute to New Caledonia's development?

A participant in the global energy transition, Prony Resources sustainably contributes to New Caledonia's development by processing its nickel and cobalt resources in accordance with the highest industrial and environmental standards.

What will TotalEnergies do in New Caledonia?

Noumea, December 20, 2021 - TotalEnergies will develop a series of photovoltaic and energy storage projects in New Caledonia in order to deliver decarbonized electricity via a 25-year renewable power purchase agreement (PPA) for the industrial operations of mining and metallurgy consortium Prony Resources New Caledonia.

What is New Caledonia's energy mix?

New Caledonia's energy mix consists of 97.7% fossil fuels, including 54.1% petroleum products (mainly fuel oil and diesel), 43.6% coal, and 2.3% renewable energies. The metallurgical industry consumes 61.2% of the total energy consumption of the territory.

Why do we support New Caledonia's energy transition?

We are very proud to support their energy transition, and that of New Caledonia," said Thierry Muller, CEO of TotalEnergies Renewables France. "As industrial firms, we think and act responsibly. Our two companies are committed to protecting natural resources and biodiversity, and to improving the situation of local communities.

What is the role of the Caledonian Energy Agency?

The Caledonian Energy Agency's role is to implement the energy transition scheme set out by the government and to contribute to the development of the electrical system. It also promotes the rational use of energy and the development of renewable energies.

Noumea, December 20, 2021 - TotalEnergies will develop a series of photovoltaic and energy storage projects in New Caledonia in order to deliver decarbonized electricity via a 25-year renewable power purchase agreement (PPA) for the industrial operations of mining and metallurgy consortium Prony Resources New Caledonia.. Between 2022 and 2025, the ...

The Initium features a new "Art of Steel" design philosophy, which is described as pushing the formability of steel to the extreme. It also includes various details to signal its hydrogen and future-driven focus, such as "+"

graphics in the bumper, and the HTWO symbol. ... accessible and therefore fair energy source for everyone. We are ...

INITIUM, meaning "beginning" in Latin, represents Hyundai's pioneering efforts in hydrogen mobility and its commitment to creating a sustainable future powered by clean energy. This concept vehicle previews an exciting new production FCEV that Hyundai plans to launch in the first half of 2025.

By combining solar energy and energy storage to replace electricity generated from coal, TotalEnergies is demonstrating its ability to provide a sustainable energy solution to Prony Resources New Caledonia ...

INITIUM, derived from Latin meaning "beginning" or "first," represents Hyundai's pioneering role in hydrogen energy and its dedication to building a sustainable hydrogen-powered future. This concept vehicle ...

By combining solar energy and energy storage to replace electricity generated from coal, TotalEnergies is demonstrating its ability to provide a sustainable energy solution to Prony Resources...

Alongside the unveiling of INITIUM, Hyundai showcased a rich exhibition illustrating its hydrogen technology journey. Photos, records, and blueprints from the time when Hyundai embarked on the hydrogen vehicle development to the actual launch of the first mass-produced FCEV NEXO--the first dedicated hydrogen fuel cell model--provided a ...

We are mainly active in New Caledonia and Wallis and Futuna through our retail activities. We are also a major player in the renewable electricity generation sector. We lead several community ...

INITIUM is a concept model that showcases the market potential and design direction for its upcoming passenger FCEV which is set to debut in the first half of 2025. INITIUM is a Latin word meaning "beginning" or "first", representing Hyundai Motor's status as a hydrogen energy pioneer and its commitment to develop a hydrogen society.

Strong energy dependence linked to the metallurgical sector. New Caledonia's energy mix is 97.7% fossil fuel, including 54.1% petroleum products (mainly fuel oil and diesel), 43.6% coal, and 2.3% renewable energies. This high energy dependence is directly linked to the metallurgical industry which consumes 61.2% of the total energy consumption of the territory.

INITIUM is a Latin word meaning "beginning" or "first", representing Hyundai Motor's status as a hydrogen energy pioneer and its commitment to develop a hydrogen society. INITIUM provides a preview of a new production FCEV that Hyundai Motor plans to unveil in the first half of next year. The concept encapsulates the company's 27 ...

We look forward to sharing the Initium experience with you in this new city. Paris, known for its love of art and luxury, is the perfect place to extend our expertise and enable even more enthusiasts to discover the art of
