

Installation of energy storage cabinet requires filing

What are the IRC requirements for energy storage systems?

There are other requirements in IRC Section R328 that are not within the scope of this bulletin. 2021 IRC Section R328.2 states: "Energy storage systems (ESS) shall be listed and labeled in accordance with UL 9540." UL 9540-16 is the product safety standard for Energy Storage Systems and Equipment referenced in Chapter 44 of the 2021 IRC.

Do energy storage systems need to be labeled?

2021 IRC Section R328.2 states: "Energy storage systems (ESS) shall be listed and labeled in accordance with UL 9540." UL 9540-16 is the product safety standard for Energy Storage Systems and Equipment referenced in Chapter 44 of the 2021 IRC. The basic requirement for ESS marking is to be "labeled in accordance with UL 9540."

What is the energy storage system guide?

Through their efforts, the Energy Storage System Guide for Compliance with Safety Codes and Standards 2016 was developed. This code for residential buildings creates minimum regulations for one- and two-family dwellings of three stories or less.

What are the fire and building codes for energy storage systems?

However, many designers and installers, especially those new to energy storage systems, are unfamiliar with the fire and building codes pertaining to battery installations. Another code-making body is the National Fire Protection Association (NFPA). Some states adopt the NFPA 1 Fire Code rather than the IFC.

What is a safe energy storage system (ESS)?

Timely deployment of a safe ESS is the way to document and validate compliance with current Codes, Standards, and Regulations (CSR). A task force under the CSR working group was formed to address compliance with current CSR. Through their efforts, the Energy Storage System Guide for Compliance with Safety Codes and Standards 2016 was developed.

Are stationary storage batteries the future of energy storage?

An increased number of electrical energy storage systems (EESS) utilizing stationary storage batteries are appearing on the market to help meet the energy needs of society--most notably storage of power generated from renewable resources or the electric grid for use during power outages or peak electrical demand periods.
