Using Intel's AI Analytics Toolkit, we tried to predict freshwater quality, achieving an F1 score of 0.81786 with TabNet ensemble models, addressing data ...

What's New: Ahead of Enlit Europe, Intel announced that its technology is helping power the Edge for Smart Secondary Substations (E4S) Alliance's new solution to modernize the energy grid. The E4S solution disrupts the existing system, helping it move from a proprietary, closed-hardware architecture to an open, flexible, software-defined energy system.
