

The InteliNeo 530 BESS is an advanced energy management system providing secure and reliable control and monitoring for battery energy storage systems (BESS) to ensure the highest level of Storage System performance. Designed to respond to the needs of BESS packagers, it enables direct integration of the Battery Management System (BMS) with the ...

Our configuration software tool, InteliConfig, now has a new version available for download. This version supports all the controllers that ComAp has launched recently - InteliNeo 530 BESS, InteliSys 2000 and InteliNano AMF 5. In addition, the latest InteliConfig version now includes a new docking system feature, which enables users to customise their working ...

The InteliNeo 6000 features the power behind our recently released InteliGen 1000 and will be the standard for renewable energy integration in larger, multi-power source sites. It can control the entire microgrid site in islanded or grid ...

InteliNeo controllers can manage any source of renewable power, be it solar, wind, batteries, or hydrogen. ... including BESS and up to 64 gen-sets. The InteliNeo 5500 is an all-in-one solution featuring a full-colour display and is designed to be a master controller in a smaller microgrid site. The InteliNeo 5500 still controls multiple ...

Product Description	Ordercode	CM-RS232-485	Dualportinterface	CM223248XBX	CM2-4G-GPS	4G&
GPSplug-incommunicationmodule			CM24GGPSXBX		CM3-Ethernet	
Internet/Ethernetplug-incommunicationmodule			CM3ETHERXBX		EM-BIO8-EFCP	
8additionalbinaryinputs/outputs	EM2BIO8EXBX		IDC4/4		4DCVoltage/Currentmeasurement	
EM1DC44XBDB						

InteliNeo 530 BESS is now available to order. InteliNeo 530 BESS enables direct integration of the Battery Management System (BMS) with the Power Conversion System (PCS) within a BESS, as well as control, ...

InteliNeo 530 BESS is built on ComAp's well-known and globally used platforms, similar to InteliNeo 5500 or InteliGen 500 G2, so the controller setup should be fast and easy for customers who already have experience with our controllers, ...

O InteliNeo 530 BESS é construído sobre plataformas bem conhecidas e amplamente utilizadas da ComAp, semelhantes ao InteliNeo 5500 ou InteliGen 500 G2, portanto, a configuração do ...

InteliNeo 530 BESS también ofrece una interfaz de comunicación segura con el mundo exterior a través de Airgate 2.0. Interfaz de fácil usabilidad: InteliNeo 530 BESS se basa en las plataformas

conocidas y utilizadas en todo el mundo de ComAp, similares a InteliNeo 5500 o InteliGen 500 G2, ...

InteliNeo 530 BESS enables direct integration of the Battery Management System (BMS) with the Power Conversion System (PCS) within a BESS, as well as control, monitoring and protection of the auxiliary systems, ...

InteliNeo 530 BESS tambi n ofrece una interfaz de comunicaci n segura con el mundo exterior a trav s de Airgate 2.0. Interfaz de f cil usabilidad: InteliNeo 530 BESS se basa en las plataformas conocidas y ...

The InteliNeo 530 BESS offers safe and reliable control for the battery energy storage system and all it's key parts, and can help optimise costs, decrease noise pollution and reduce emissions. This robust energy management system enables direct integration of the Battery Management System (BMS) with the Power Conversion System (PCS) within a ...

InteliNeo 530 BESS enables the direct integration of the Battery Management System (BMS) with the Power Conversion System (PCS) within a BESS, as well as the control, monitoring, and protection of auxiliary systems, including ...

El InteliNeo 5500 es un controlador de microred que ofrece una soluci n rentable para combinar la red tradicional o los generadores con fuentes de energ a renovable, creando un sistema de generaci n de energ a confiable y eficiente. ... InteliNeo 530 BESS . Ver producto

For Multiple BESS InteliNeo can only connect to a single BESS for BCB control Exception: Battery Control Unit or master that controls multiple battery packs to provide: > Single node of communication to InteliNeo 5500/6000 > Sync functions between multiple batteries > Manage load sharing/ SOC/ cycling between multiple batteries

InteliNeo 6000 is a controller for managing and optimising on-grid and off-grid hybrid microgrid systems. ... Advanced battery state machine to provide precharge condition for BESS to transition from grid-following to grid-forming; Onboard Modbus Client for RTU/TCP communications to inverters and storage systems;
