

Inventory storage systems Guernsey

What are inventory storage solutions?

Inventory storage solutions are systems that help businesses store, manage, and track inventory. These systems typically involve physical equipment, such as racks, shelves, pallets, and bins. Inventory storage also involves strategic planning, as every business will need to decide on their approach to storing inventory.

Which inventory storage system should I Choose?

The inventory storage system you pick will depend on the size of your business. When you are first starting out, you will likely store your inventory at home: in your garage, basement, or somewhere else. For more established businesses, storing inventory in a warehouse or partnering with a fulfillment provider is a better option.

What is inventory storage & why is it important?

Inventory storage also involves strategic planning, as every business will need to decide on their approach to storing inventory. For example, a business may adopt the "first-in, first-out", or FIFO method of storing inventory, where the oldest inventory in storage is always sold before newer inventory.

Why is inventory storage important for ecommerce businesses?

Storing inventory is a necessary part of running any business that sells physical goods. The storage needs will vary from business to business, based on sales volume, product attributes, and locations sold. As an ecommerce business, it can be tough to know which inventory storage system is the best for your business.

Where should I store my inventory?

When you are first starting out, you will likely store your inventory at home: in your garage, basement, or somewhere else. For more established businesses, storing inventory in a warehouse or partnering with a fulfillment provider is a better option. Here are pros and cons to all three inventory storage options. 1. Self-storage

How do you handle inventory in a store?

If you handle inventory in your own facility or store, first organize and identify storage areas, such as racks, shelves and bins, then assign each product to a specific area. Small inventory items can be sorted and stored by SKU in labeled bins or on sections of shelves, while larger products can be stored on pallets.
