The Rystad Energy Institute delivers tailor-made and open enrollment courses across the entire energy landscape. Our bottom-up approach collects data points at the lowest level of granularity to create a complete and detailed analysis.

Will Iraq become BP's largest energy resource?

"Putting this into context, that tally would be about 70,000 bpd higher than BP is poised to produce from the US shale sector in 2024, and Iraq would emerge as the company's largest production of one energy resource type in a single country.

How much did ExxonMobil spend on Iraqi upstream operations?

"ExxonMobil spent more than \$250 million last year on its Iraqi upstream operations, and we have projected that this number would likely be ramped up by an additional \$150 million over the next five years as the company aims to increase production through 2024.
