

Ireland genteng solar panel

Are solar panels a good investment in Ireland?

Solar panels in Ireland are a good investment and a typical solar PV system usually pays for itself in around 5-6 years. After that, it's free electricity all the way. The initial outlay for a solar PV system is roughly EUR7,000 to EUR10,000. Most of our customers generate more solar electricity than the average Irish household consumes each year.

Do solar panels work in Ireland?

Short answer: yes, solar panels in Ireland work very well. Most of the solar PV systems that we install generate more electricity than the average Irish home consumes. Here's what that looks like in practice. What is the forecast annual power output for our past customers?

How much do solar panels cost in Ireland?

The cost of a solar PV system varies depending on the size of your roof, whether you want to add a battery etc. But as a ballpark guide, most PV systems cost roughly EUR7,000 to EUR10,000. This takes into account the government grant of up to EUR2,100. For more information, check out our full guide to solar panels Ireland cost and savings.

How long does it take to install solar panels in Ireland?

The installation of a solar PV system typically takes 1-2 days, depending on the size and complexity of the system. Kirra Energy ensures a swift and efficient process, minimising any disruption to your daily routine. Can I still benefit from solar power during Ireland's cloudy days? Is my home suitable for solar panels?

What battery solutions does Electric Ireland offer?

Electric Ireland offers a range of battery solutions from Dyness and Sonnen. Batteries are modular and are available in 5kWh to 15kWh sizes. Our Solar experts will advise you on battery suitability during your consultation. Batteries storage can also be added to existing Solar installations once Electric Ireland has installed the original system.
