What does WTS energy do?

WTS Energy © 2024. All Rights Reserved WTS Energy supports energy companies in their transition to a carbon neutral society by developing and delivering local talent worldwide.

What will Ireland's energy supply look like in 2022?

Petrol demand may be 7.4% higher than in 2022 and reach 96.5% of the pre-COVID demand observed in 2019. Transport emissions may be 11.8 MtCO₂e, up slightly on 2022 emissions. In the first 9 months of 2023, Ireland imported 9.1% of its electricity supply, up from 1.1% in 2022.

What percentage of Ireland's Electricity comes from renewables?

38.9% of electricity generated in Ireland came from renewables. Practically all new electricity demand in the last decade has come from the commercial services sector. Electricity demand in the commercial services sector has increased by 61.5% since 2012, while the electricity demand in all other sectors has increased by just 8.0%.

What is the future of electricity in Ireland?

Remaining demand is mainly for heat, which is met by fossil fuels. According to the Sustainable Energy Authority of Ireland, more than half of this can be electrified, and new innovations like thermal batteries can work well with a variable renewable electricity system.

What percentage of Ireland's Electricity comes from fossil fuels?

93.9% of road transport energy demand came from fossil fuels. Demand for electricity was 2.5% higher than in 2021, consistent with the annual growth of recent years. The carbon intensity of Ireland's electricity was 332 gCO₂/kWh. 49.2% of the electricity indigenously generated in Ireland came from gas.
