

# Is adding photovoltaic panels considered a renovation

Can solar PV be used in New construction?

Integrating solar photovoltaics (PV) into new construction is becoming more and more popular in the United States. In California, rooftop solar PV became a requirement on newly built homes starting in 2020 and in some cities, this rule also applies to major renovations.

Do solar panels add value to your home?

Finally, a third study cited by the National Renewable Energy Laboratory (NREL) in the Appraisal Journal says that solar increases home value by \$20 for every \$1 reduction in annual utility bills. For example, a solar panel system that saves you \$400 each year would add about \$8,000 in value to your property.

Do solar panels increase home resale value?

For a 6-kilowatt (kW) solar PV system, that means solar can add \$24,000 to home resale value! Another study, this time from Zillow in 2019, comes to the same conclusion - homes with solar panels sell for 4.1% more. The Zillow study notes that the percentage increase in home value changes by geography.

Should you buy a home with solar panels?

A home with solar panels has lower electricity bills than an equivalent home without solar panels. Over the life of the solar system, the savings exceed the higher up-front price of the home. Homebuilders can share information with consumers about financing options and incentives described in the Homeowner's Guide to Going Solar.

Can solar panels be reinstalled if you move?

Homeowners have a few options with their solar panels when moving. If your new home is only a short distance away, the solar installer should be able to handle the reinstallation at your new location. However, if you are moving to another city or state, you'll have to weigh the costs versus benefits.

Does a solar energy system add value to your property?

The conventional wisdom from HGTV and home improvement magazines is that updating your kitchen, renovating your bathroom, or building an addition are the smartest ways to increase the value of your property. But there's another home improvement that you may not realize adds to your property's value: installing a solar energy system on your roof.

If you plan on building a new home, doing a major renovation or addition, or constructing a secondary structure to your property, now is a great time to think about adding solar to your project. If you're considering solar for ...

1. Is My Home a Good Candidate for Solar Panel installation? Factors to consider when weighing a home's
