

# Is it okay to work with photovoltaic panels on your back

Can you walk on solar panels?

In short, yes. However, while walking on solar panels is possible and safe for you and the panels, it is not always recommended. To help you understand more about it, in this article, we explain how resistant solar panels are, how to walk on top of a solar panel properly, and what will happen if you do it the wrong way.

Are solar panels safe?

Safety issues are common for solar installations, but proactively putting preventive measures in place can help mitigate on-the-job injuries. Solar panels are heavy and awkward to lift and carry. Loading and unloading panels from trucks and onto roofs can cause: Solar panels also heat up quickly when exposed to sunlight.

Can you lift solar panels on your own?

If your roof is not very high, you may be able to lift the solar panels on your own. But to avoid potential back injuries, don't work alone. Ideally, you need two people to lift the solar panel from the ground and two more working on the roof. Follow all safety rules that apply to electrical systems.

How do solar installers ensure the safety of a solar panel system?

Solar installers ensure the safety of your solar panel system in two ways: solar panel grounding and rapid shutdown. When installing a solar panel system, one of the key ways to keep yourself safe from electrical surges is to ground your panels.

How do you keep workers safe from a solar PV system?

Some of the ways you can keep workers safe include: Covering the solar array with an opaque sheet to block the sun's light. Treating wiring coming from a solar PV system with the same caution as a utility power line. That means assume all wires are live.

Can a solar panel installer walk on top of a module?

While some solar panel installers walk on top of modules when performing an installation, there is still a danger of glass breaking and the module getting damaged. Most installers walk skillfully and do not put pressure on the middle of the glass to avoid damaging it or the solar cells.

3. On-grid DIY solar panel with A-frame: Plug-In Solar 340W DIY Solar Power Kit for ground or flat roof (from \$163.76) This kit comes with an adjustable metal A-frame (below) so you can set up your solar panel in your ...
