

Is it worth installing solar panels to generate electricity

Are solar panels a good investment?

Buying solar panels is a long-term investment that should help cut your electricity bills and carbon footprint. But will they pay for themselves and earn you money? Solar panels are often marketed as a way to save money on electricity - and sometimes as a way to make money too.

Why should you install solar panels?

Installing solar panels lets you use free, renewable, low carbon electricity. You can sell surplus electricity to the grid or store it for later use. According to low-carbon certification organisation MCS, there were more than 183,000 solar panel installations across the UK in 2023.

Is going solar worth it?

Well, the answer is yes. Going solar is worth it because you can expect significant savings on your yearly electricity bills (up to £1,005) and cut your carbon footprint by almost a tonne in pollution for the average solar panel system.

Is it worth getting solar panels in the UK?

It's definitely worth getting solar panels in the UK. The UK isn't especially sunny, but it receives more than enough daylight to save households hundreds of pounds per year on their electricity bills - and what you don't use, you can sell to the grid.

How much does a solar panel system cost?

Solar electricity is low carbon, renewable energy. A typical home solar panel system could save around one tonne of carbon per year, depending on where you live in the UK. That's the equivalent of driving 3,600 miles, or from London to Bristol 30 times. The average domestic solar panel system is 3.5kWp and costs around £7,000.

Are solar panels worth it?

If you're ready to save some cash, while you help save the planet, take a look at the solar panel stats and weigh up the pros and cons of solar panels for yourself to see if they will be worthwhile. Solar panels are very energy-efficient and reduce reliance on the National Grid.
